Start up

Open **MyVTech Soother** app, all your paired devices will be auto connected.
Select the device you want to use.

Pair a soother

If you want to use a new soother, ensure the new soother is turned on and select the device under **AVAILABLE DEVICES** and follow the instructions in the mobile app to set up and pair your soother.

Home screen

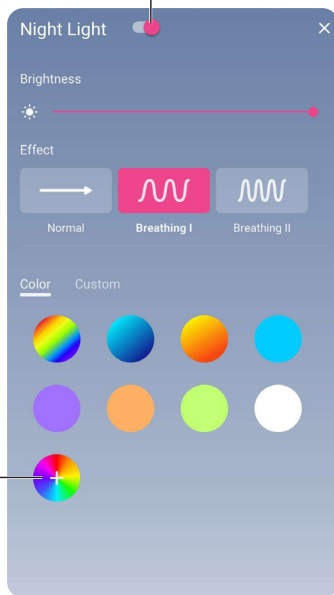

Night light

The night light can illuminate in different colours to calm your baby in a dark room. Tap **Control** from the Main Menu to enter the **Control** panel,

- Drag the  **Brightness** bar to adjust the night light brightness.
- Tap  on the Control panel to enter the Night light panel. You can turn the night light on or off, adjust the brightness, select the effect and the colour.

Enable the slide bar to turn on.

- For Normal Effect, the night light illuminates with a steady light. The night light brightness will not reduce lower than about 5%.
For Breathing I, the night light flashes slowly in your selected colour.
For Breathing II, the night light flashes quickly in your selected colour.
The night light brightness for Breathing I and II will not reduce lower than about 25%.

Tap + to add a new colour.

- To add a colour, tap  and choose a new colour from the presets or the colour palette, then tap **Add Colour** to add a new colour to the preset panel. A total of 7 colours can be added.

- Press and hold an added colour to enter editing mode and delete any added colours.

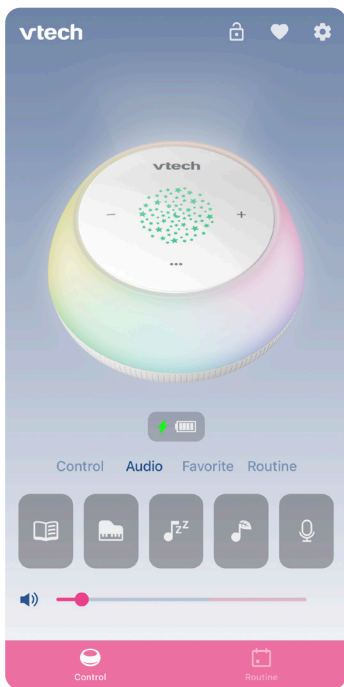

- Tap **Custom** to change to a different night light colour from the preset colours.

Audio

Tap  on the **Control** panel, or tap **Audio** from the Main Menu to enter the Audio play panel.

- Drag the  Volume bar to adjust the volume of the audio.
- Tap  **Story**,  **Classical music**,  **Lullaby**,  **Natural Sound** to enter the play panel.

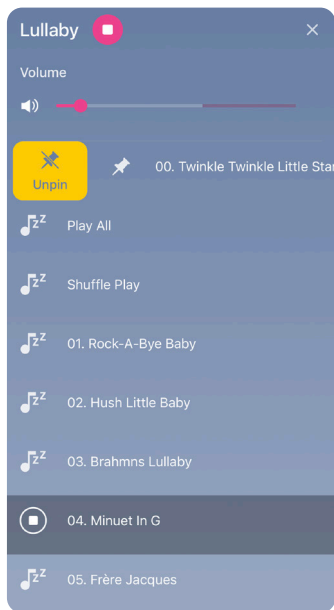

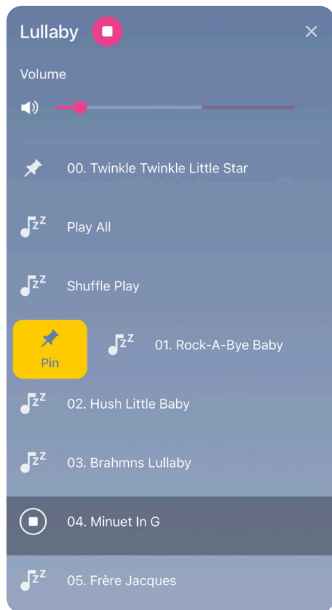

- You can play all, shuffle play or select a melody or sound to play from the playlist.
- Adjust the audio playback volume with the bar shown at the top of the screen.

NOTE: See **"Ear Protection"** in **Settings** section for pop up.

Audio (Cont'd)

- **Pin or unpin audio:** Pin your baby's favourite audio on the top for easy access. Swipe right on your selected audio and click on the pin icon to pin the audio. Swipe right on the pinned audio and click on the unpin icon to unpin it.

- Tap  to enter **Recording** panel. You can make your own recordings and play a recording from the list. You can make 2 recordings of up to 20 seconds each. Stay on the screen when uploading the audio to soother. Swipe left to delete a recording.

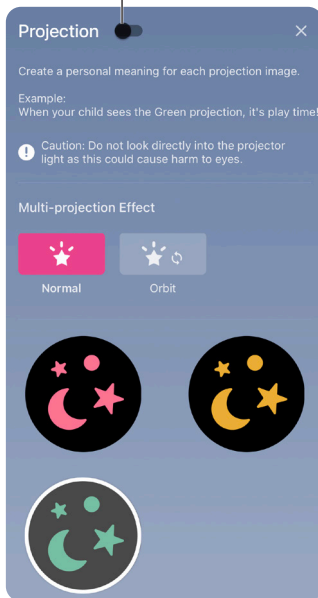

Projection

You can create a personal meaning for each projection image, such as play time, sleep time, wake time...

On the **Control** panel, tap  to enter the Projection panel.

- Turn the projection on or off and select a projection effect for your baby.

Enable the slide bar to turn on.

- Tap **Normal** and only the selected images are projected.
Tap **Orbit** and all the images will displayed in sequence.

Favourite mode

Use favourite mode to preset your favourite night light, audio and projection combinations.

- Tap  to enter the favourite mode editing panel.

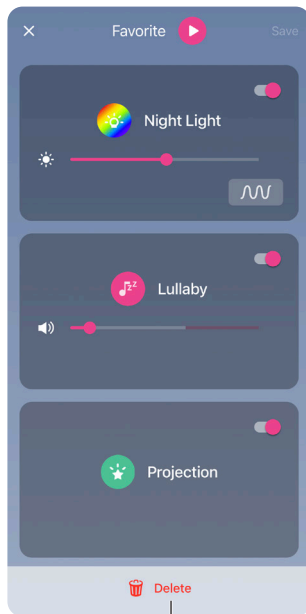

- Tap **Favourite** from the Main Menu to view all the favourite mode list. You can slide left and right to select your favourite mode added.

Favourite mode (Cont'd)

- Tap + to add a new mode, or tap  to edit an existing mode. You can add up to 10 favourite modes.

Click this icon to add new favourite mode.

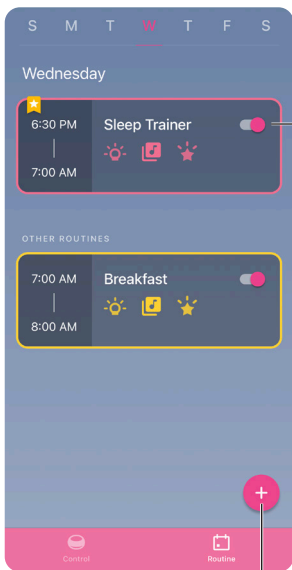

Click here to delete a favourite mode.

Routine

Schedule the activation of your soother using a weekly timetable that fits your baby's routine, including sleep time, wake-up time, playtime, etc.

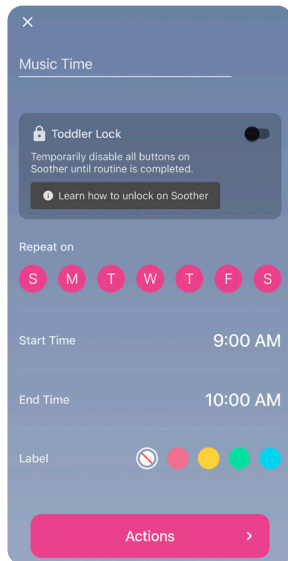

Tap  on the bottom of the panel to enter the routine editing panel.

- Tap **+** to add a new routine or select an existing routine to edit. You can set the routine name, weekly schedule, Start Time, End Time and choose the label colour of the routine. The Toddler Lock can be set to disable keys when the routine is active. After setting the schedule, tap **Actions** to enter the routine action editing panel.

Remember to toggle on the switch to activate the routine.

Click here to create a new routine.

Routine (Cont'd)

- Tap on the grid to enter the corresponding tabs for adding the night light, audio, and projection.

- Within these tabs, adjust the timing using the top bar and customise further settings below, similar to the control menu.

- Once you have finished configuring the settings, tap the "Save" option located on the top right. Please note that if different types of audio overlap with each other, you will be unable to save the settings.

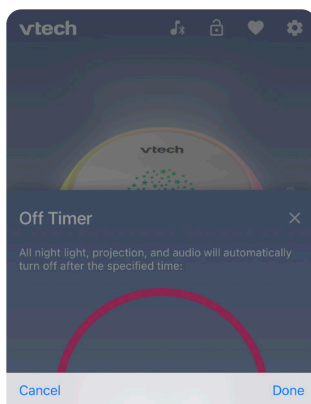

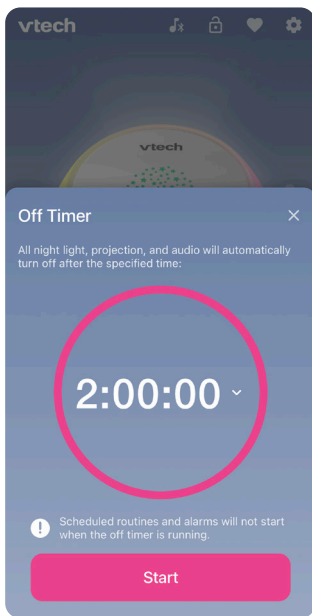

- Slide the selected routine to the left to delete or duplicate a routine.
- Tap **Routine** from the Main Menu to view routine list.

Off Timer

To soothe your baby for a short time, you can select the time period to 30 minutes, 1 hour, 2 hours, 3 hours or 4 hours to temporarily turn the soother off. The night light, projection and audio will be automatically turned off for the time and duration set for the off timer.

- Tap **Control** from the Main Menu to go to the Control panel, tap , select the time period and tap **Start** to start the timer.

Clock

Set the **Nap Timer** to automatically turn the soother Night Light, Lullaby and Projection on:

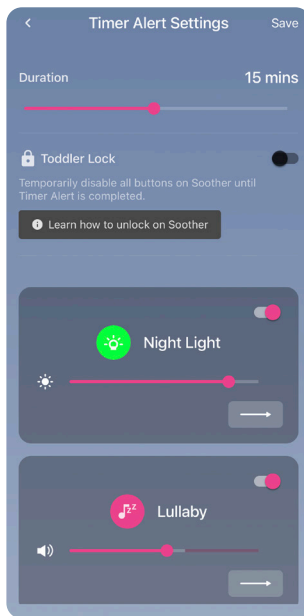

- Tap **Control** from the Main Menu to go to the control panel, tap .

- Select the **Nap Timer** duration within the red circle (30 minutes, 1 hour, 2 hours, 3 hours and 4 hours) to turn off the Timer Alert.
- Tap **Start** to start the Timer Alert. Scheduled routine and alarms will not start when the nap timer is running.

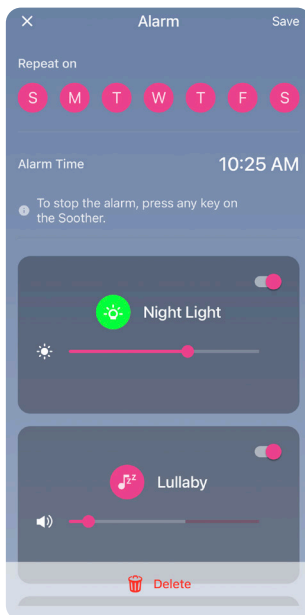

Clock (Cont'd)

- Tap **Timer Alert Settings** to set the duration (1 - 30 minutes) for the chosen Night Light effects, Audio, Projection mode and to set the Toddler Lock on and off.

Set the **Alarm**:

- Tap **Alarm** on the Clock setting panel.
- Tap **+** to add a new alarm. Set the days for the alarm, the Alarm Time, Night Light, Audio and Projection mode.
- To stop the alarm, press any key on the Soother.

Settings

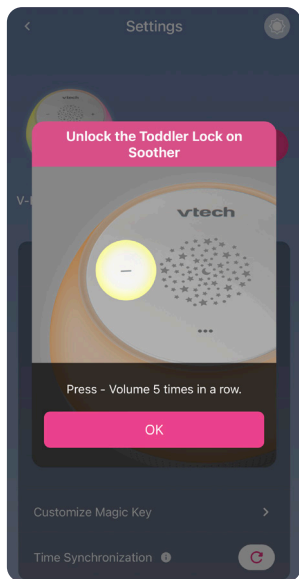

You can turn the Toddler Lock and the Ear Protection on or off, set the Magic Key and find the general soother settings on this page.

Toddler Lock

- Tap  on the home screen to directly turn the Toddler Lock on to temporarily disable all soother buttons.
- Alternatively, tap  to go into the Settings panel, then switch the Toddler Lock on or off.

- You can press the - button 5 times on the soother to unlock the Toddler Lock.

Ear Protection

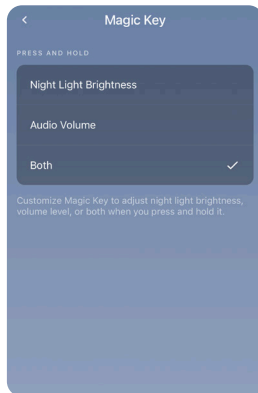

- Turn on Ear Protection to keep soother sounds within a safe listening level by limiting the volume.
- If Ear Protection is switched on, when you increase the volume, a message will pop up to remind you the volume level limit has been reached.
- You can disable Ear Protection to increase the volume limit.

Settings (Cont'd)

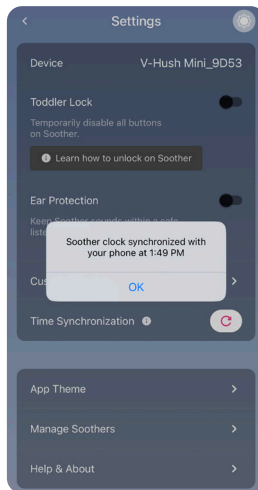

Customise Magic Key

Set the Magic Key (●●●) function on the soother to adjust the night light brightness, the volume level or both when the Magic Key is pressed and held.

Time Synchronisation

Tap  to synchronise the soother clock time with your phone.

App Theme

Switch the app background to Light Mode, Dark Mode or System.

You can also tap  in the top right corner of the app settings page to cycle between the three themes.

Manage Soothers

If your app is paired to more than one soother, these will be displayed in the "My Devices" screen.

Providing a soother is turned on, you can select and connect to it. You can only operate one soother at one time.

Swipe left to delete any soother.

Settings (for BC8313 only)

LED Display

Enable LED Display to show the clock and temperature on the soother. Enter **Advanced Display Settings** to customise the display.

General Status

Synchronise the clock, choose the clock and temperature format of the LED display.

Advanced Display Settings

Scheduled Display: Enable and set the time to turn the LED display on or off.

Items: Choose to display the clock, temperature, or both.

Switch interval: Select the interval switching time between showing the clock and temperature displays.

Brightness: Choose from three available LED display brightness levels.
